

Getting Started

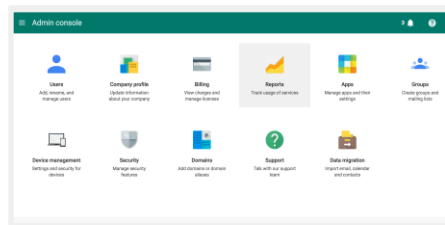

CatchOn is an analytics tool that helps school districts use real-time usage data to inform technology purchasing and adoption decisions. Our focus is providing information that can help education leaders ensure technology is optimized for teaching and learning in both in and out of the classroom. We're here to help educators make wise technology decisions - Are you ready?

Deployment Guide

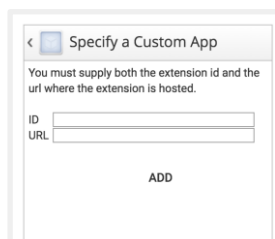

This guide will walk you step by step through the ONE time (never again) deployment of CatchOn for your Chromebooks, including how to hide the icon on device taskbars.

Install CatchOn for Chrome

1. Log into the Google Admin Console
2. Select **Device Management** > **Chrome Management** in the top left

3. Select **Chrome Management** > **User Settings**
4. Select **Manage force-installed apps** > **Specify a Custom App** > Add custom ID and URL credentials provided by your CatchOn success manager. Click **ADD**

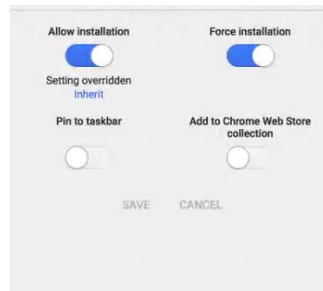

5. Click **Save**

*You must be a Google Admin to install this tool

Hide CatchOn Plug-In

1. Go to **Device Management > Chrome Management**
2. Select **App Management > CatchOn Insight > User Settings**
3. Select your Main Domain. Your settings should look like the below image. Click **Save**

*You must be a Google Admin to install this tool
